

Hostel Management App

Develop a simple hostel management app, where only registered users can login using user name and password.

Tools & Technology :

1. Database : MySQL
2. Design : Swing Java
3. Core Java
4. JDBC

****How to use user portal project?**

- There have two folder one is **Bachelor Point** this is java project , another is **bachelor_point.sql** this is database folder.
- Open **Bachelor Point** folder in Netbeans.
- Create a database **bachelor_point**. (because I connected java project to database name as user_portal_data)
- And Import **bachelor_point.sql** in this database.
